TABLE OF CONTENTS

No. 1. January 1938

The potassium and water contents of cat nerves as affected by stimulation. W. O. Fenn 1
The effect of stimulation on the potassium content of limulus leg nerves. Allan C. Young 4
The non-centrifugal degeneration of severed peripheral nerve. Oscar Sugar 7
An oscillographic study of the cerebello-cerebral relationships. A. Earl Walker 16
Human brain potentials during the onset of sleep. H. Davis, P. A. Davis, A. L. Loomis, E. N. Harvey and G. Hobart 24
The behavior of cats following bilateral removal of the rostral portion of the cerebral hemispheres. H. W. Magoun and S. W. Ranson 39
Forced circling movements in monkeys following lesions of the frontal lobes. Margaret A. Kennard and Léon Ectors 45
The representation of respiratory movements in the cerebral cortex. Wilbur K. Smith 55
Functional organization in the sensory cortex of the monkey (*Macaca mulatta*). J. G. Dusser de Barenne and W. S. McCulloch 69

No. 2. March 1938

Brain potentials and voluntary muscle activity in man. H. H. Jasper and H. L. Andrews 87
Activation of heat loss mechanisms by local heating of the brain. H. W. Magoun, F. Harrison, J. R. Brobeck and S. W. Ranson 101
Localized thermal changes in the cat's brain. H. M. Serota and R. W. Gerard 115
On an ipsilateral motor effect from cortical stimulation in the macaque monkey. Oscar A. M. Wyss 125
On the kinetics of recovery during the refractory period in frog's nerve. H. A. Blair 127
Functional recovery in ocular muscles of a chimpanzee after section of oculomotor nerve. Morris B. Bender and J. F. Fulton 144
Electrical excitability of the motor face area: a comparative study in primates. A. Earl Walker and H. D. Green 152
Facilitation of reflex action in the spinal cat following asphyxia of the cord from cyanide and increased intra-spinal pressure. E. L. Porter, R. K. Blair and S. W. Bohmfalk 166
The direct functional interrelation of sensory cortex and optic thalamus. J. G. Dusser de Barenne and W. S. McCulloch 176

No. 3. May 1938

Limits of variation of the synaptic delay of motoneurons. R. Lorente de Nó 187
Synaptic stimulation of motoneurons as a local process. R. Lorente de Nó 195
Analysis of the activity of the chains of internuncial neurons. R. Lorente de Nó 207
Localization of cerebral lesions by electro-encephalography. Theodore J. Case and Paul C. Bucy 245
The effects of ablation of the cortical motor face area in monkeys. Harold D. Green and A. Earl Walker 262
Cell-changes in some of the hypothalamic nuclei in experimental fever. L. O. Morgan 281

No. 4. July 1938

Zur Elektrodenanordnung bei den Registrierungen bioelektrischer Potentialschwankungen der Hirnrinde. A. E. Kornmüller and J. A. Schaeder 287
The influence of hypoglycemia on the sensitivity of the central nervous system to oxygen want. Ernst Gellhorn, R. C. Ingraham and L. Moldavsky 301
The distribution of the alpha rhythm over the cerebral cortex of normal man. Morton A. Rubin 313

Effects of blood pressure changes on cortical potentials during anesthesia. H. K. Beecher, F. K. McDonough and A. Forbes 324
Inhibition and impulse summation at the mammalian neuromuscular junction. C. A. Maaske, T. E. Boyd and John J. Brosnan 332
Autonomic activity and brain potentials associated with "voluntary" control of the pilomotors (*MM. arrectores pilorum*). Donald B. Lindsley and William H. Sassaman 342
The influence of hypothalamic stimulation on intestinal activity. Jules H. Masserman and E. W. Haertig 350
On the relationship between choline esterase and the development of behavior in amphibia. Karl Arden Youngstrom 357
Sensorimotor cortex, nucleus caudatus and thalamus opticus. J. G. Dusser de Barenne and W. S. McCulloch 364
Reflex discharge from the spinal cord over the dorsal roots. Jan F. Toennies 378

No. 5. September 1938

Potential records from the optic cortex of the cat. G. H. Bishop and James O'Leary 391
A sensory cortical representation of the vagus nerve. Percival Bailey and Frédéric Bremer 405
Distribution of disturbance-patterns in the human electroencephalogram, with special reference to sleep. Alfred L. Loomis, E. Newton Harvey and Garret A. Hobart 413
The fright reaction after section of the facial, trigeminal and cervical sympathetic nerves. Morris B. Bender and Margaret A. Kennard 431
Functional organization in the face-subdivision of the sensory cortex of the monkey (*Macaca mulatta*). J. G. Dusser de Barenne, W. S. McCulloch and Teizo Ogawa 436
Pathways through the sympathetic nervous system of the bullfrog. G. H. Bishop and James O'Leary 442
Postural neck reflexes in the labyrinthectomized monkey and their effect on the grasp reflex. J. F. Fulton and Robert S. Dow 455
The influence of posture on responses elicitable from the cortex cerebri of cats. James W. Ward 463

No. 6. November 1938

Reorganization of motor function in the cerebral cortex of monkeys deprived of motor and premotor areas in infancy. Margaret A. Kennard 477
The summation of facilitating and inhibitory effects at the mammalian neuromuscular junction. T. E. Boyd, J. J. Brosnan and C. A. Maaske 497
A further study of the crossed phrenic phenomenon. A. Rosenblueth, C. T. Klopp and F. A. Simeone 508
A Fourier transform of the electroencephalogram. Albert M. Grass and Frederic A. Gibbs 521
The influence of cyanide on brain potentials in man. Morton A. Rubin and Harry Freeman 527
Certain effects of prolonged stimulation of afferent nerves on the reflexes evoked. David McK. Rioch, Clarence Nelson and Edward W. Dempsey 533
Separation in the brain stem of the mechanism of heat loss from those of heat production. Allen D. Keller 543
Anoxia and brain potentials. O. Sugar and R. W. Gerard 558
Studies on corticohypothalamic relations in the cat and man. Roy R. Grinker and Herman Serota 573
Effects on electroencephalogram of various agents used in treating schizophrenia Frederick Lemere 590
